### 4. FIRST AID MEASURES

#### 4.1 Description of first aid measures

- General:** Move victim to fresh air.  
Call 911 or emergency medical service.  
Give artificial respiration if victim is not breathing.  
Do not use mouth-to-mouth method if victim ingested or inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.  
Administer oxygen if breathing is difficult.  
Remove and isolate contaminated clothing and shoes.  
In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes.  
In case of burns, immediately cool affected skin for as long as possible with cold water. Do not remove clothing if adhering to skin.  
Keep victim warm and quiet.  
Effects of exposure (inhalation, ingestion, or skin contact) to substance may be delayed.  
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
- Inhalation:** Move victim to fresh air. If breathing is irregular or stopped, give artificial respiration. If unconscious, place in the recovery position and obtain immediate medical attention.
- Eyes:** Irrigate copiously with clean, fresh water for at least 15 minutes, holding eyelids apart, and seek medical attention.
- Skin:** Remove contaminated clothing. Wash with soap and water.
- Ingestion:** If the person is conscious, induce vomiting immediately by giving two glasses of water and pressing finger down throat. Repeat until vomit is clear, then give milk. Contact a physician immediately.

## 4.2 Most important symptoms and effects, both acute and delayed

**Overview** Effects of contact or inhalation may be delayed. Possible cancer hazard. Contains an ingredient which may cause cancer based on animal data.

**Inhalation:** Highly irritating to upper respiratory tract. May cause inflammation of the lining of the nose, throat, and lungs, with bronchial pneumonia and edema possible from extreme irritating exposure.

**Eyes:** Causes severe eye irritation.

**Skin:** Contact with dust can cause reddening and swelling. Prolonged and repeated contact causes a hardening effect. May cause contact allergic dermatitis.

**Ingestion:** Harmful if swallowed.
